

METAL COATINGS

BRP URETHANES

WHY BRP URETHANES?

- Very good gloss and color retention
- Brush, roller and spray application
- Fast drying (three to five hours)
- Resists high impact, mar and abrasion
- Available in satin and gloss finishes
- Dynamic color ranges
- Dirt resistant
- Lower price option
- Excellent adhesion
- Good chemical resistance
- Low-VOC urethane can help earn LEED credits

DURABLE URETHANE COATINGS AT A GREAT VALUE

PPG BRP Urethanes are high-performance, two-component coatings used to restore exterior architectural metals and metal roofs. They exhibit excellent chemical and weather resistance and will not discolor or chalk when exposed to ultraviolet light. BRP Urethanes offer good resistance to humidity and salts, as well as protection against mar and abrasion. These cross-linked coatings provide new life for tired building components at an exceptional value.

A LONG-LASTING FINISH DESIGNED FOR BUILDING RENEWAL PROJECTS

The BRP Urethane paints are extremely durable and offer long-lasting color and gloss retention under a wide range of exterior exposures. BRP Urethanes also provide a harder surface than other types of acrylic coatings, so rain will wash dirt off the hard surface relatively easily. Easy to apply, these coatings can be brushed, rolled or sprayed and are available in two sheens (satin and gloss), metallic effects and colors that are ideal for building renewal. Additionally, a low-VOC urethane (<50g/L VOC) is available if you are trying to meet VOC regulations and the U.S. Green Building Council's LEED standards.

COLOR SELECTION AND SUPPORT

Whether it's bringing your building vision to life, creating colorful storefronts, or matching a vibrant color sample, count on PPG and the BRP Urethane line of products to provide you with the high-chroma colors you are looking for. The unique formulation of PPG BRP Urethanes enables the coatings to attain a rich palette of vivid solid colors, metallics and special effects. Additionally, PPG can provide you with expertise and guidance in both color selection and delivery.
